

# Good Clinical Practice Course at AHRI

## Call for Applications

Armauer Hansen Research Institute (AHRI) is a biomedical, clinical epidemiology research, and clinical trial facility under the federal ministry of health of Ethiopia. AHRI is known as a hub for skill and technology transfer by providing competitive post-graduate and short research training opportunities.

AHRI prepared a GCP training in marking the week of 'International Clinical Trial Day, May 20' with an overall aim of increasing the pool of clinical researchers who are trained in the basics of clinical research such as GCP.

### Course description:

This training is designed to equip trainees with appropriate knowledge, skill and attitude required to undertake good clinical research. It is an accredited course with 15 continuous education units (CEU) that could be used for relicensing.

### Trainees' selection criteria's:

This training is designed for:-

- Clinical investigators, research coordinators, and research team members who are engaged with a research endeavor involving human participants
- Anyone directly involved in the design, conduct, oversight and management of clinical research involving human subjects.

### Course Duration:

- 5 days.

Note: - Please make sure you mention the training title in the application (motivation letter)

### Training Venue:

- This training will be delivered in accredited IST centers, (ALERT Training center).

### Training Date:

- The week of May 16th, 2022

### How to Apply

Applicants who fulfill the trainees selection criteria's above should submit the following documents to AHRI Research Training Directorate, (research.training@ahri.gov.et).

- Application letter and their CV, including full contact details of two referees;
- Recommendation letter from their university/institution/department to take this training.

**Application closing date: Ten working days after the date of advertisement.**
